# Evaluation

- Development
  - Evaluate Performance & Reliability by competition
- Tests
  - Evaluate Unit Tests, Regression Tests, ...
- Code Review & Revision
  - Evaluate Github Activities
- Documents
  - Requirements and Specification
  - Design and Plan

# Development Management

- When you fail to complete the planned development for the current sprint
  - You should split the development plan into two and complete the first
  - The first version should be a working program with less functionality or performance
  - Revise the documents accordingly
